

### "Fortnite- Addiction or Amusement?"

Fortnite is currently up there as a contestant for the most popular game. The main question is though, is Fortnite addicting or pure amusement? Fortnite is pure amusement because it is a entertaining way to spend time with friends. *good*

*one*  
Reason number is the fact that "Fortnite has a format that in order to win, you have to use strategy." "this teaches you how to consistently think while doing something." These two quotes are from my teacher Ms.Klochkoff. This shows that Fortnite enforces strategic thinking to get the main goal.

Reason number two is the fact that Fortnie is not as violent as other games like Grand Theft Auto. According to Dexerto "In the grand scheme of things, Fortnite is one of the most enjoyable and least disturbing games that youngsters could play." *explain evidence*

Others may argue that Fortnite is violent, but Fortnite has no blood, and when the characters "die" they just disappear. As a parent contributed in the article "Fortnite-Addiction or Amusement?" "When you kill someone they turn into a pile of loot." This shows that Epic games (the creator of Fortnite) is trying to stay away from adding too much violence to Fortnite. *great counterclaim!*

In conclusion, the debate of whether or not Fortnite is an addiction or amusement might never end because people have opinions. It is a game that some adore, some strongly dislike, and then there are those who play it once in a while. Either way, the game is very popular. Fortnite lacks much violence compared to other games, which is a great
